

## My feedback

*"Yes, I am a book freak, and consider it a worthwhile purchase if I gain 1 or 2 gems from a book. Revolutionise the Way you Work gave me 12 to 15 gems. From one Quick Start to another, I thank you."*

Specifically:

- I was most impressed with the concept of charting your IPP's in Outlook to print into a graph to quantify the amount of time spent on certain activities.
- The adding of a "project" as a contact, to keep track of emails etc is inspired
- Seeing how to adapt each profile to different tasks was invaluable.
- The "sound bites" dividing up each task in the early chapters of the book with lots of pictures definitely appealed to my Quick Start nature.
- Understanding how/why I am tempted to jump into a project but am slow to follow through/complete a task was a revelation (in a good way).
